

Course Outline

Paint Shop Pro Fundamentals - 2 days

Corel's PaintShop Pro is one of the best value for money programs available today. With constant development it now has many of the features that were reserved for Professional Image Editors...but at an affordable price.

Our Fundamentals course takes you from the basics to a truly competent level where you'll be more than happy editing either individual images, or bulk processing for commercial use. We are able to train on most versions but please let us know which version you have when booking.

Like all of our courses PaintShop Pro involve a large amount of working on real images throughout the duration of the course.

If you have a specific project that you would like to work on or an effect that you want to achieve on an image then please let us know in advance. We are also able to customise this course or offer advanced courses tailored to suit your needs. Please call for more details.

Overview
